

Positronium intensity measurement preparation (GBAR)

SNU

Bongho Kim

Electrode preparation (antion chamber)

$\pm 40\text{kV}$ HV module

- Wiring ongoing.
- Labview programming almost done
- Installation will be done soon.

Next to do

- Simulation check of MCP in Antion Chamber to estimate gamma background.
- Labview program modification for FPGA for Buffer gas trap(?)
- CERN account to use GLT service (simulation sharing)
- Help Laszlo&Barbara to prepare MCP detector
