Analysis

12bar properties
        Time resolution (each position)
        speed inside the scintillator
        [ch] – [MeV] conversion factor by Mu simulation fit

Grease stability check by comparing gains
Current event rate is reasonable? Solid angle calculation
Burst analysis
2D trajectory & angle distribution

----

etc

New event reconstruction code
External trigger board property
Common errors
