

NaI-034& NaI-035(R&D)

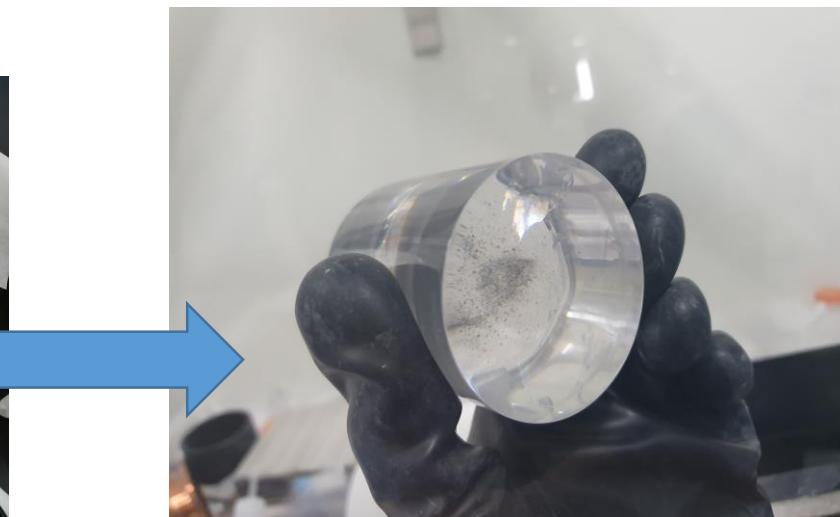

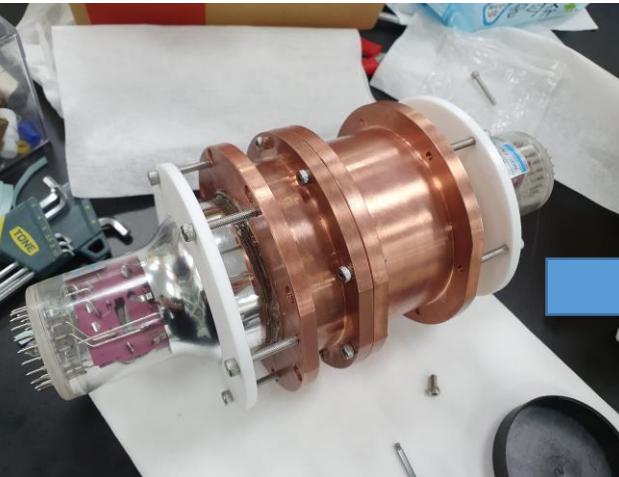

2019/12/27
Jae Jin Choi

COSINE lab_meeting

Nal-034 machining & encapsulation

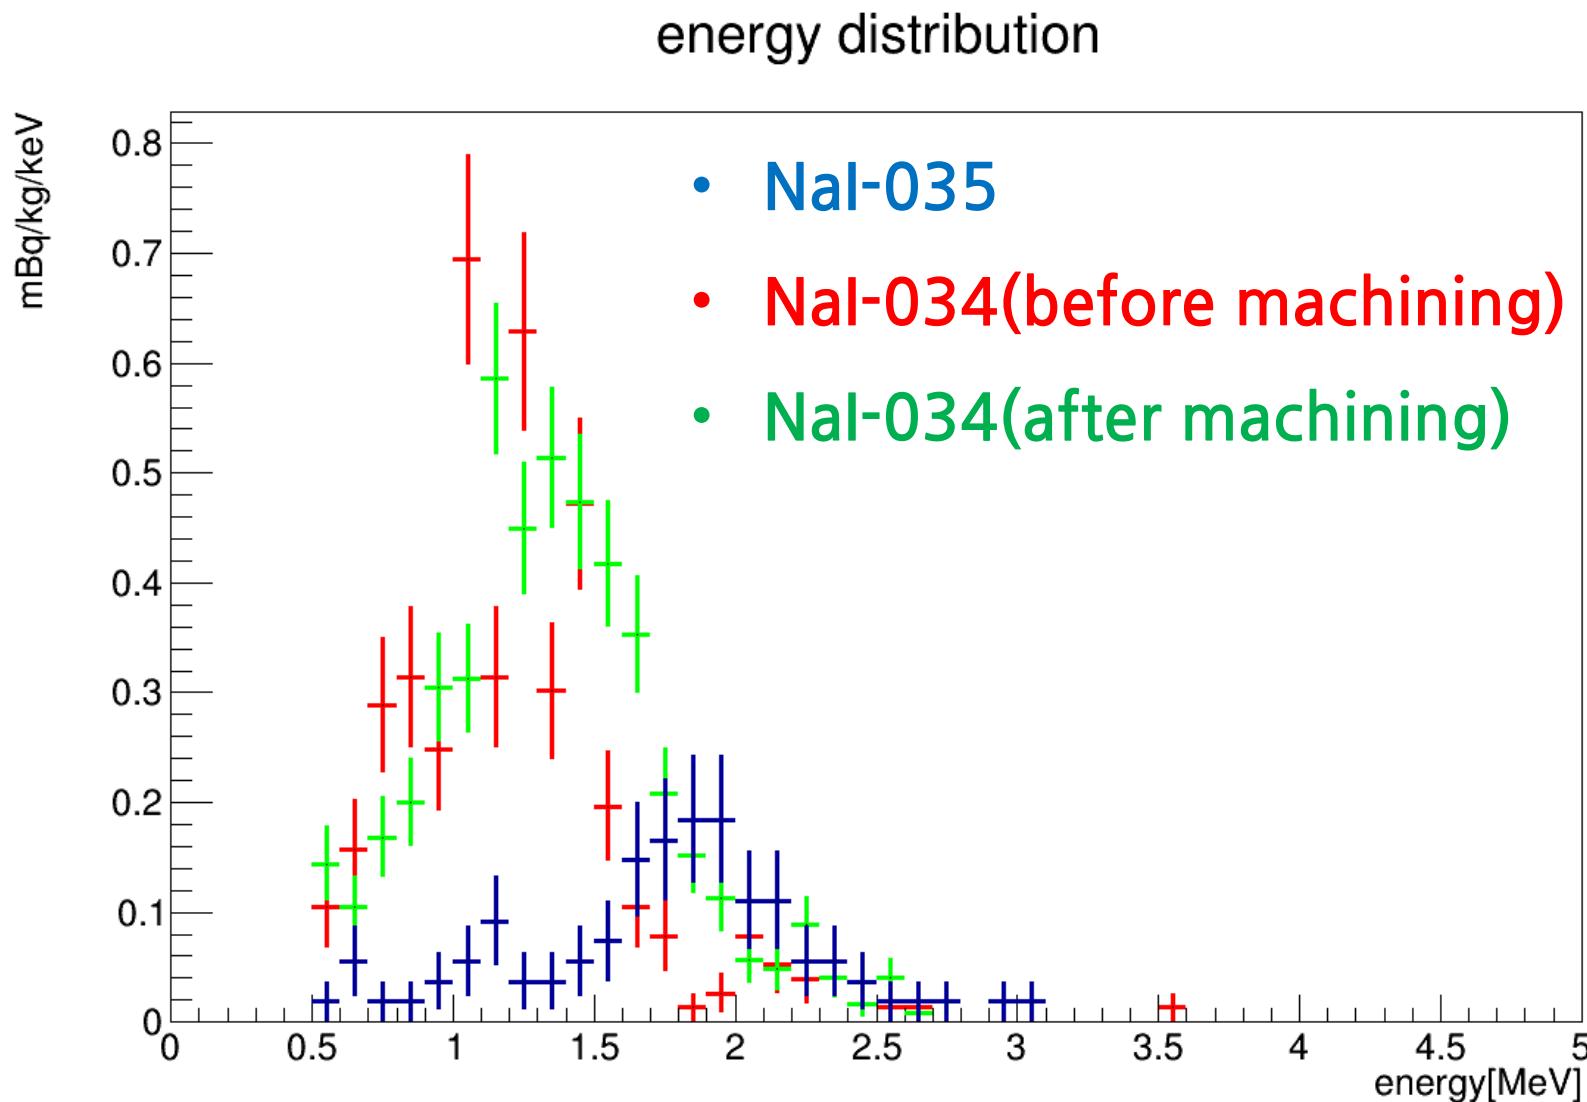

- Before machining(0.922 kg)
- After machining(cylinder,0.666 kg)

Nal-034 machining & encapsulation

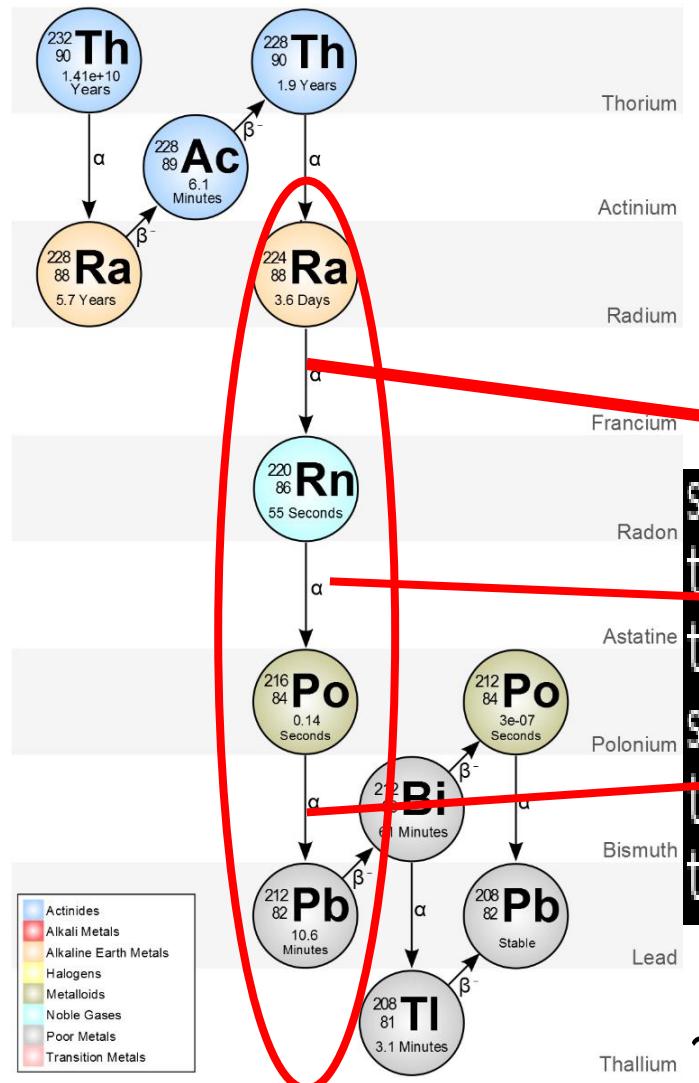

- No black dust(different TI)
- some cracks(new glove box with low humidity)

Nal-034&035 distribution(energy distribution)

Th-232 contamination

	Half life	Q value(MeV)
Th-228	1.91y	5.520
Ra-224	3.66d	5.789
Rn-220	55.6s	6.405
Po-216	0.145s	6.906

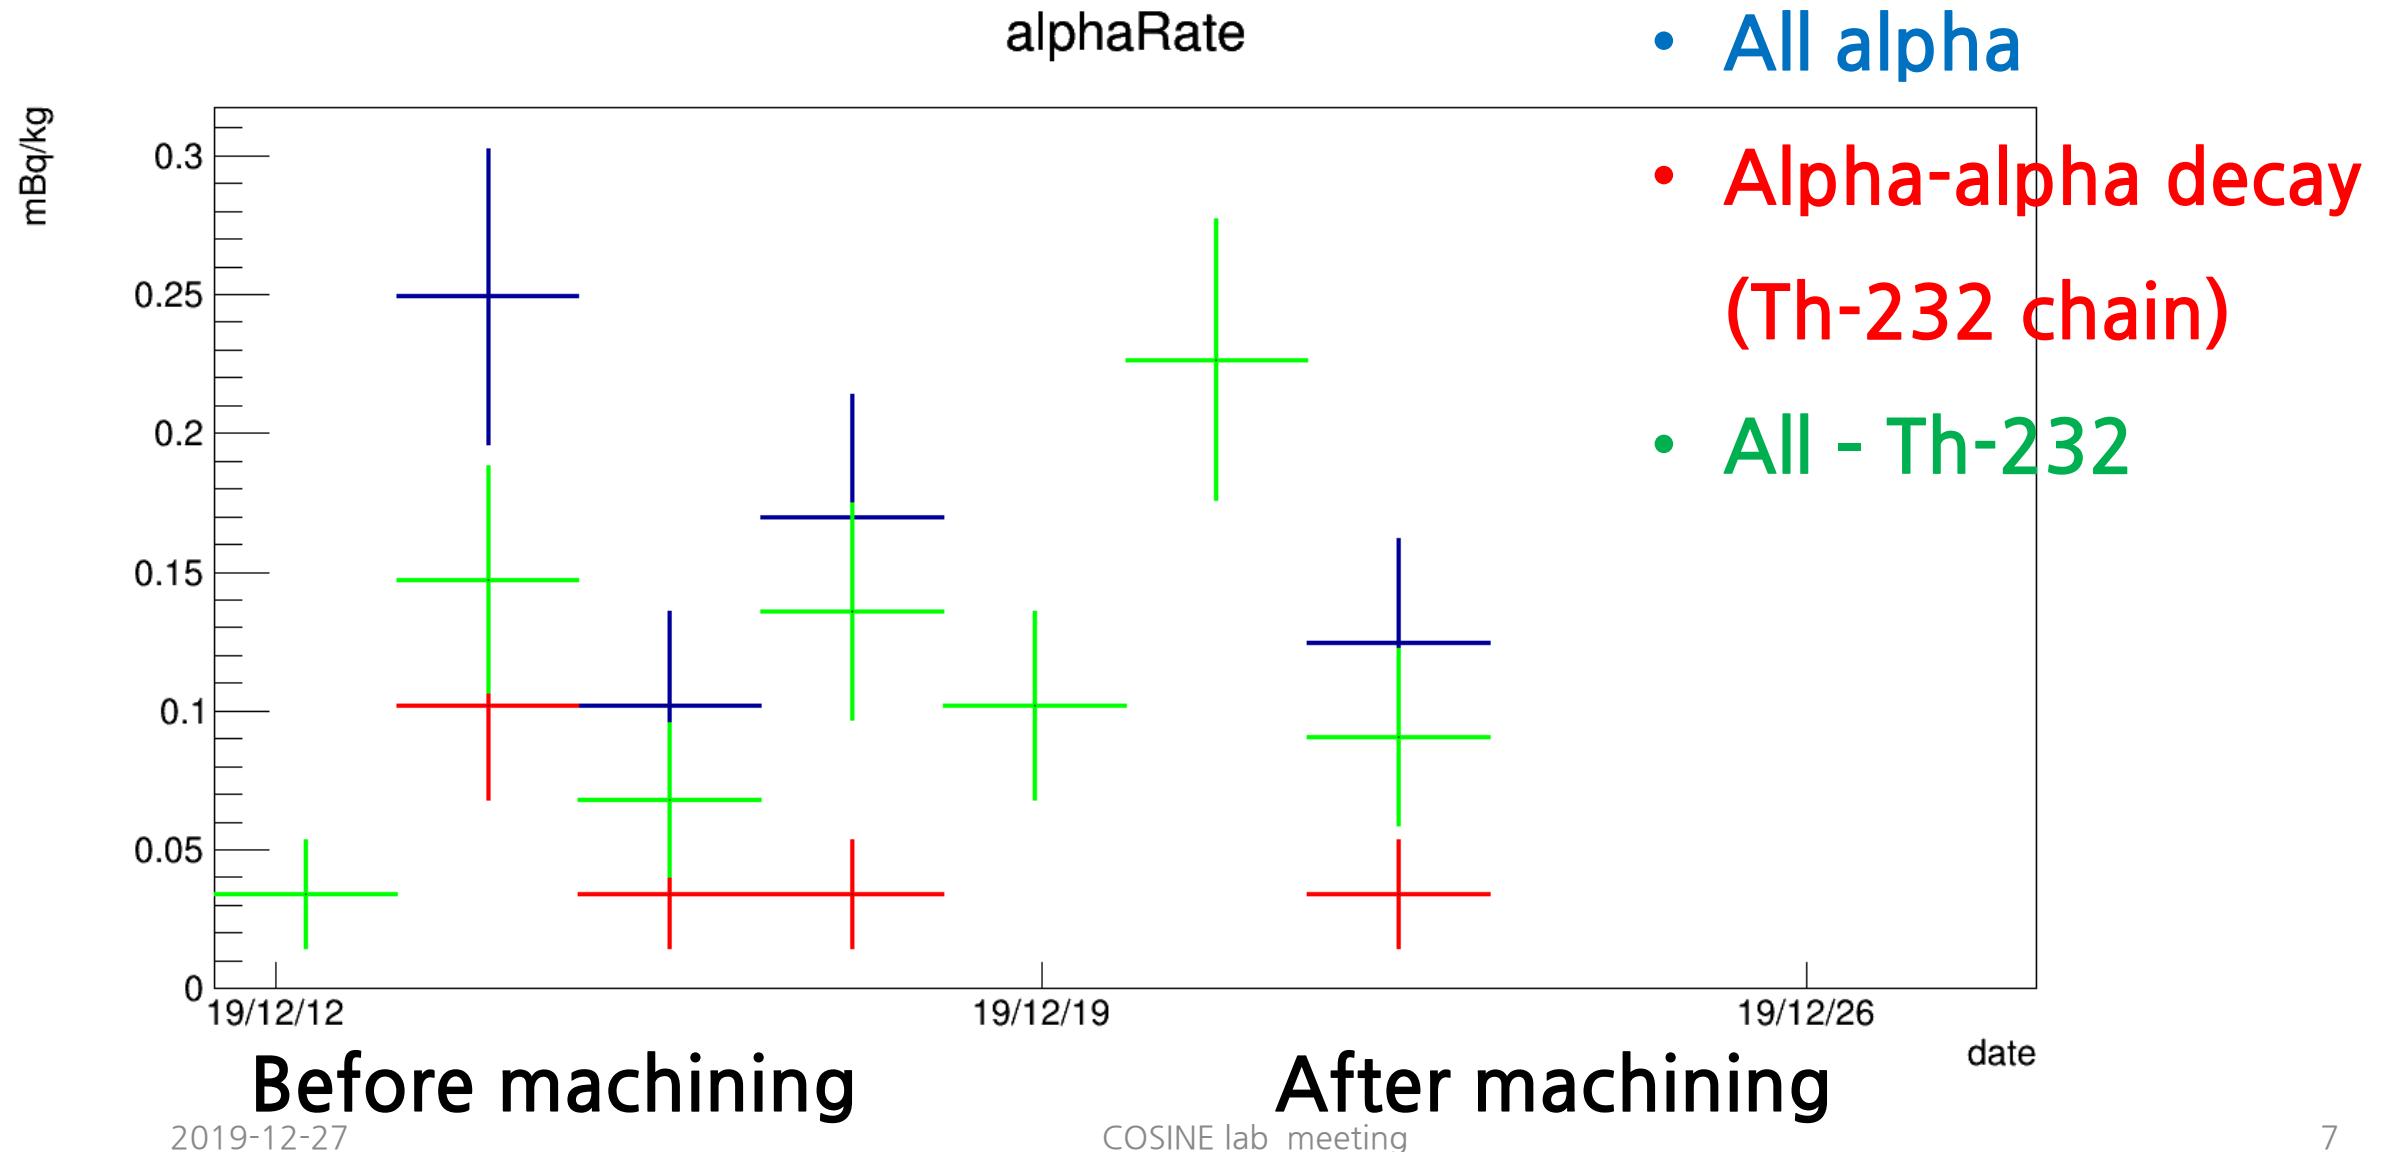

subrun	:	42	
time difference	:	32.6 s	before energy : 1.339 after energy : 1.561
time difference	:	0.02 s	before energy : 1.561 after energy : 1.787
subrun	:	43	
time difference	:	12.84 s	before energy : 0.747 after energy : 0.8847
time difference	:	0.2616 s	before energy : 0.8847 after energy : 0.7816

~ 30% alpha events from Th-232 alpha-alpha-alpha decay

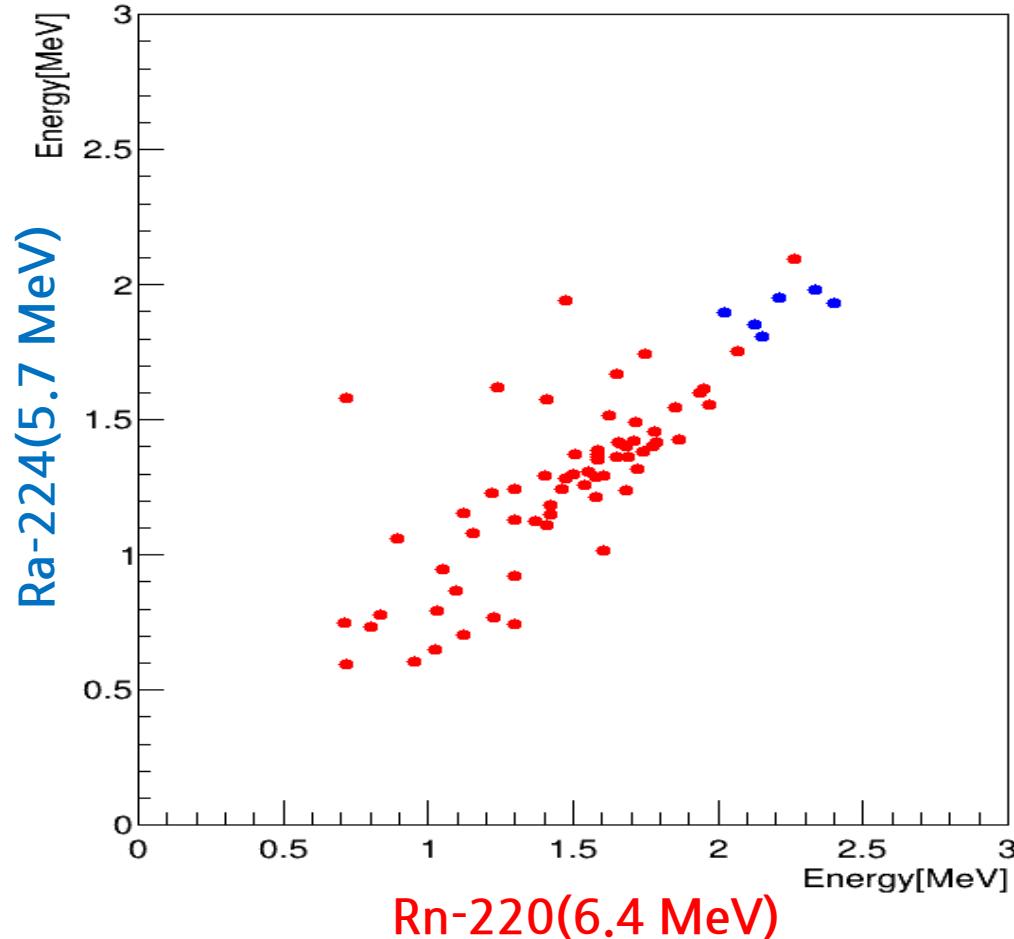

Nal-034 alpha rate

Nal-035 alpha rate

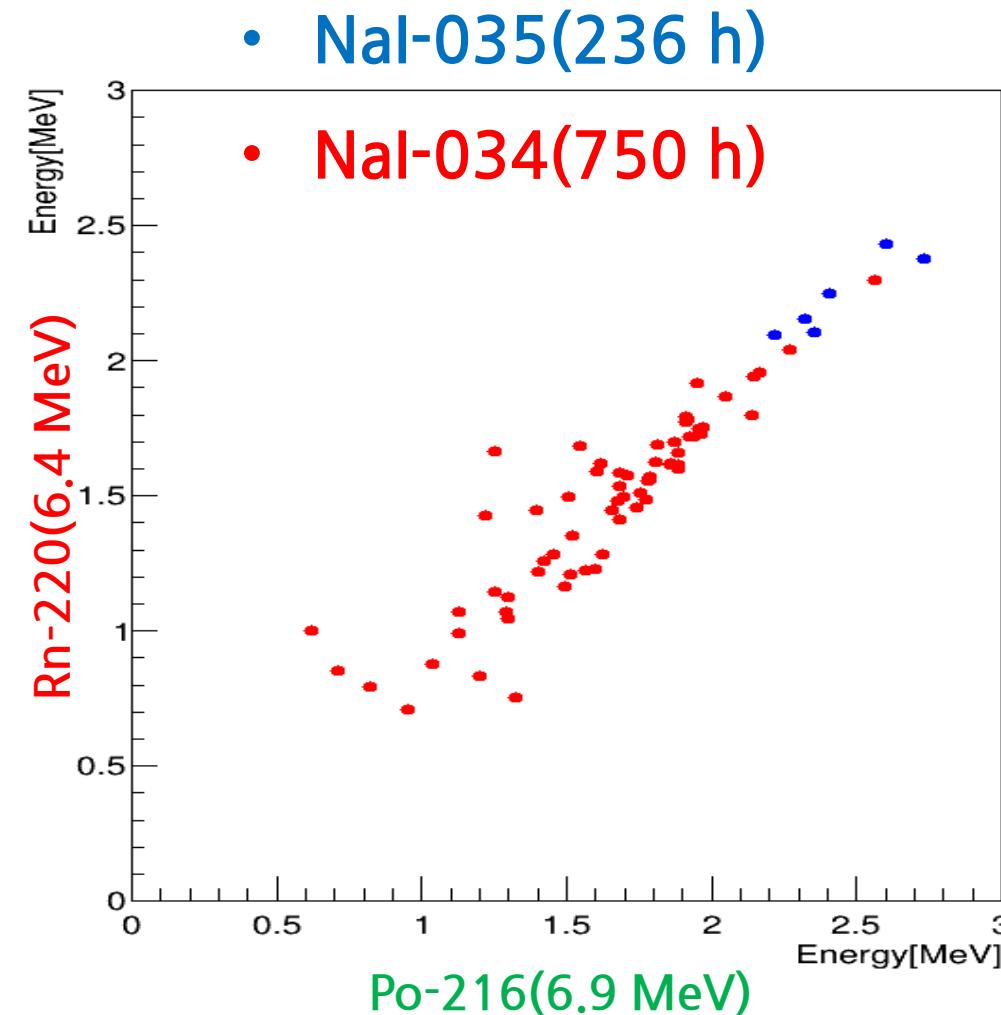

Nal-034&035 distribution(alpha-alpha energy comparison)

Rn-220(6.4 MeV)

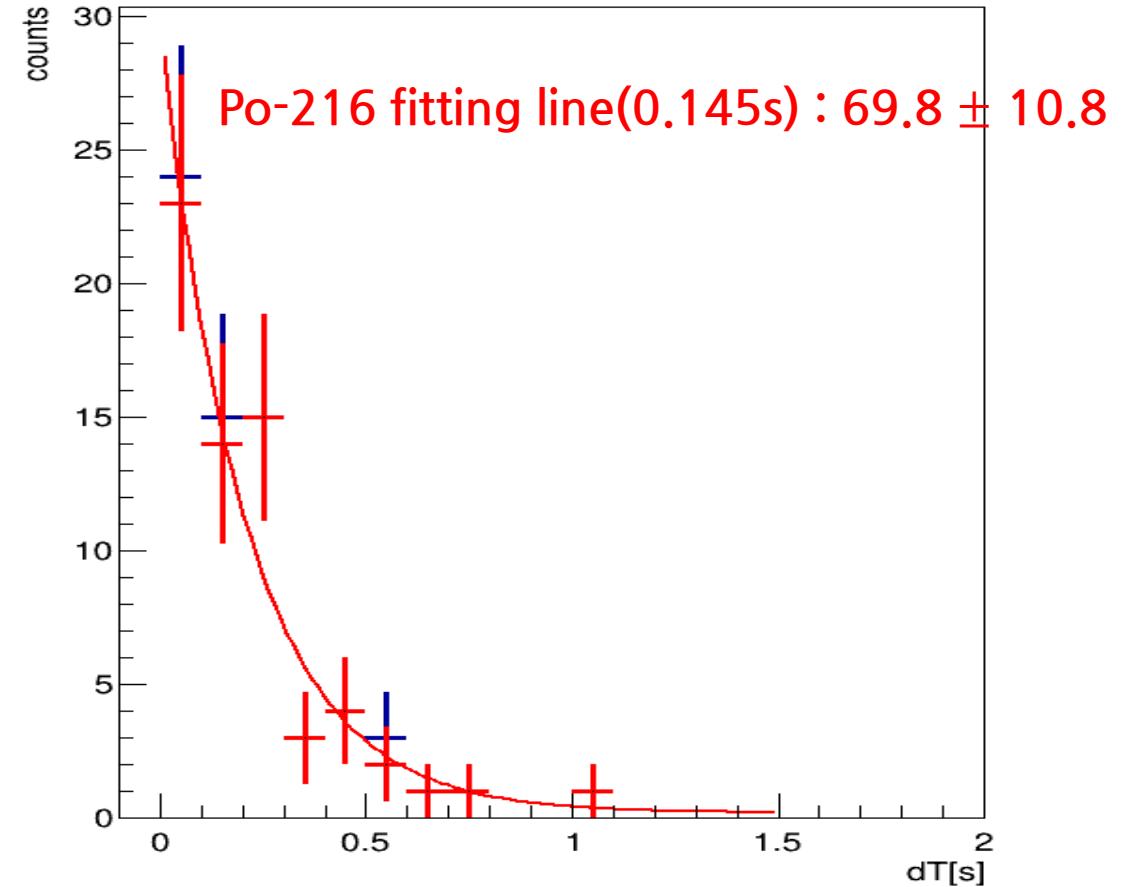

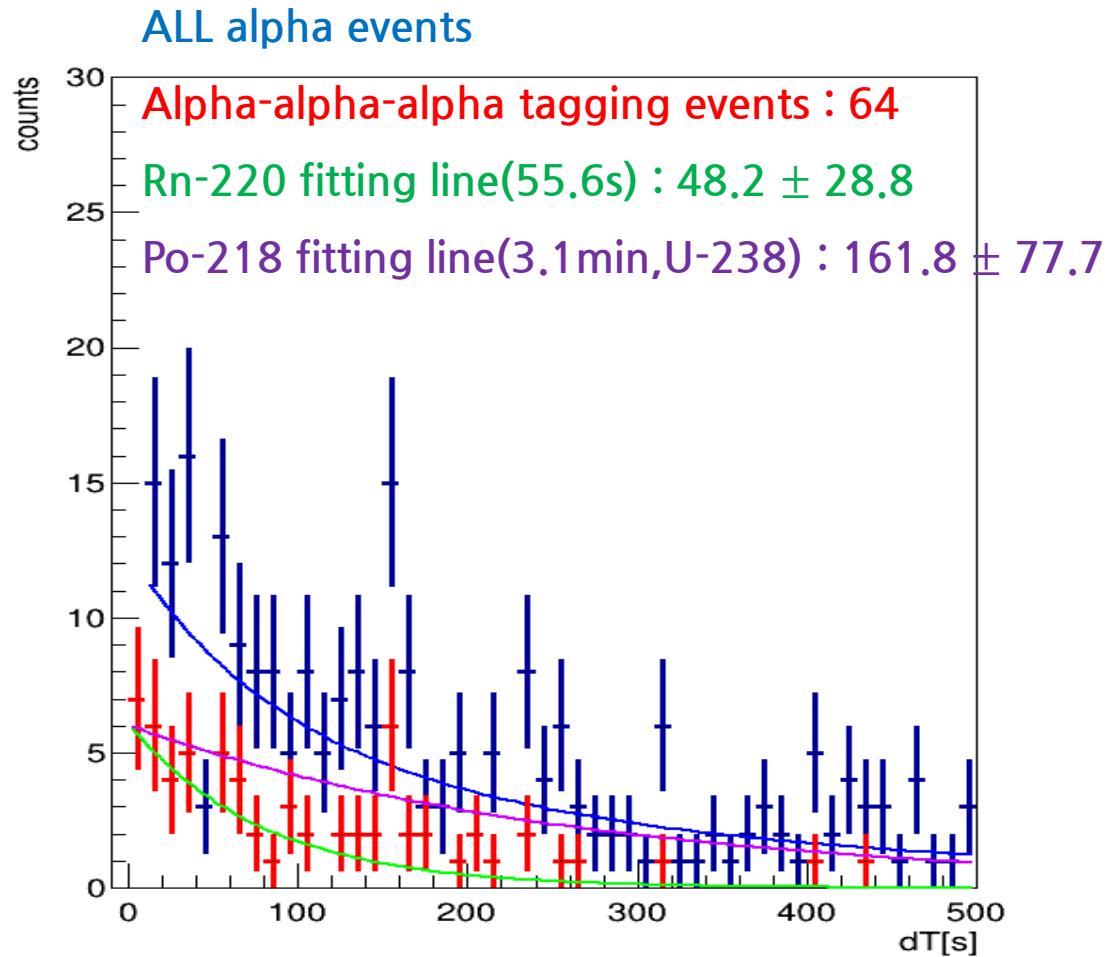

Nal-035 quenching factor is higher than Nal-034

Po-216(6.9 MeV)

Nal-034 time difference distribution

Nal-034&Nal-035 contamination(Th-232,U-238)

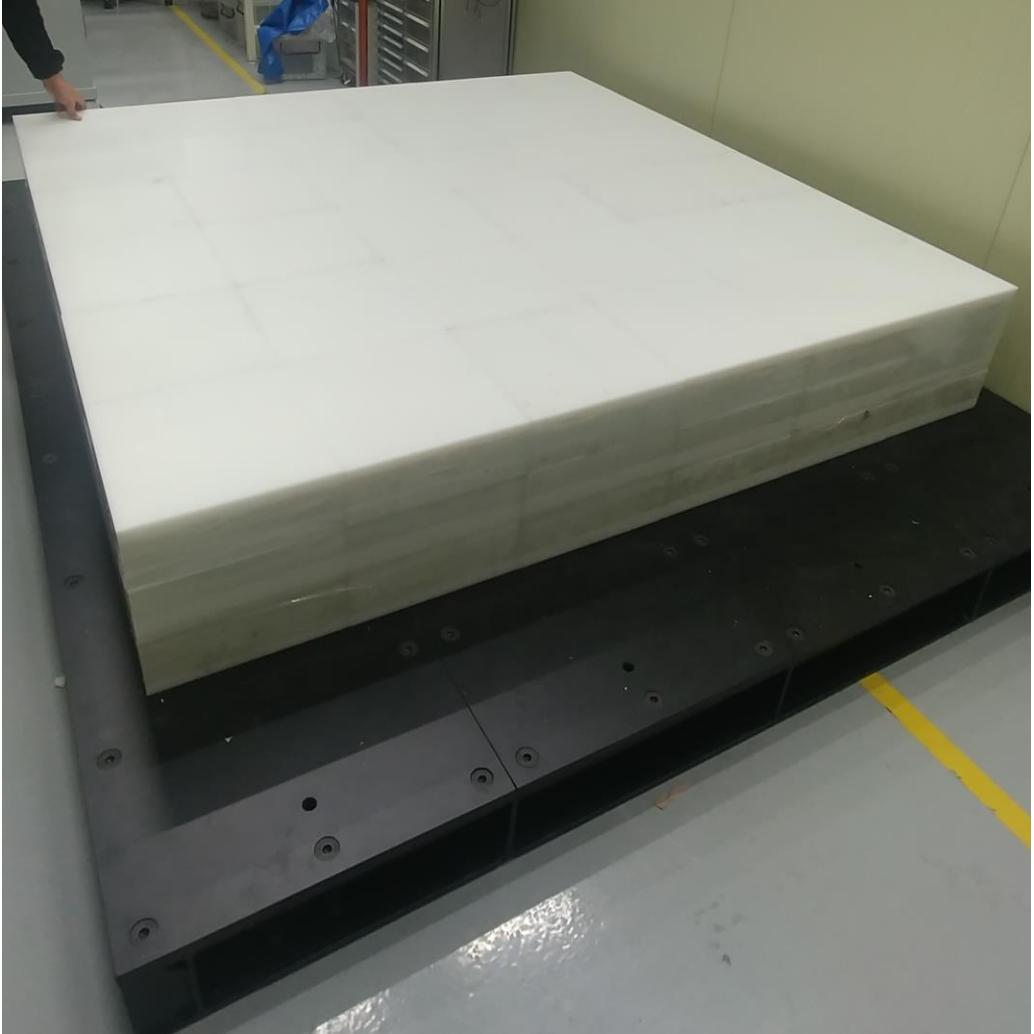

Using Alpha-alpha-alpha tagging events(only Th-232)

	Mass(kg)	Activity(uBq/kg)	Conversion to ppt(if th232 is in equilibrium)
Nal-034 Before machining(230 h)	0.922	24.8±5.5	6.1±1.4
Nal-034 After machining(520 h)	0.666	35.2±5.2	8.6±1.3
Nal-035	0.613	11.5±4.7	2.8±1.1

Using fitting line integral(Th-232,Po-216 fitting($dT < 1\text{sec}$) & U-238,Po-218 fitting($dT < 1000\text{sec}$))

Mass average(0.744 kg) Time(750 h)	Activity(uBq/kg)	Conversion to ppt(equilibrium)
Nal-034 Th-232 contamination	34.7±5.4	8.5±1.3
Nal-034 U-238 contamination	80.5±38.6	6.5±3.1

IBS HQ basement(NEON dry run)

Summary

- NaI-035 still has Th-232 chain alphas
- NaI-035 quenching factor is higher than NaI-034
 - NaI-035 alpha resolution is better than NaI-034
- Some low energy alpha events are from surface(asymmetry)
- Th-232 contamination of NaI-034 is 8.5 ± 1.3 ppt
- U-238 contamination of NaI-034 is 6.5 ± 3.1 ppt

Nal-034 alpha-alpha-alpha events(Th-232)

		Ra-224(5.7 MeV)	Rn-220(6.4 MeV)	Po-216(6.9 MeV)
subrun	: 20			
time difference	: 0.2503 s	time difference between 3 alpha : 207.6 s	before2 energy : 1.437	before energy : 1.7 after energy : 1.912
subrun	: 38			
time difference	: 0.0486 s	time difference between 3 alpha : 34.47 s	before2 energy : 1.481	before energy : 1.739 after energy : 1.981
subrun	: 42			
time difference	: 0.02 s	time difference between 3 alpha : 32.62 s	before2 energy : 1.339	before energy : 1.561 after energy : 1.787
subrun	: 43			
time difference	: 0.2616 s	time difference between 3 alpha : 13.1 s	before2 energy : 0.747	before energy : 0.8847 after energy : 0.7816
subrun	: 28			
time difference	: 0.2141 s	time difference between 3 alpha : 263.4 s	before2 energy : 1.293	before energy : 1.409 after energy : 1.628
subrun	: 42			
time difference	: 0.1505 s	time difference between 3 alpha : 160 s	before2 energy : 0.7308	before energy : 0.7338 after energy : 0.8285
subrun	: 46			
time difference	: 0.06316 s	time difference between 3 alpha : 153.9 s	before2 energy : 1.79	before energy : 2.078 after energy : 2.279

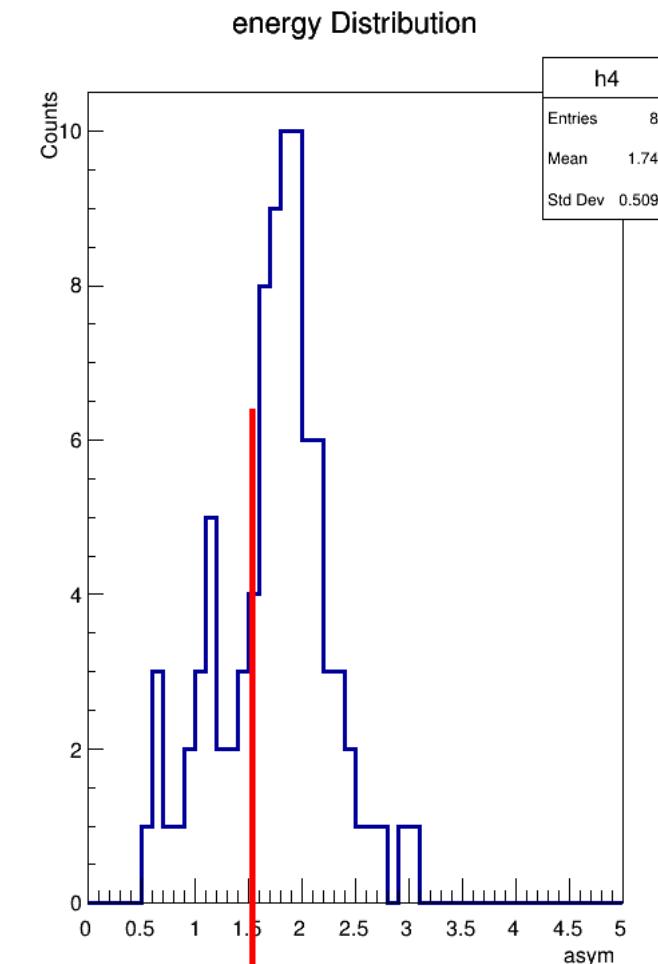

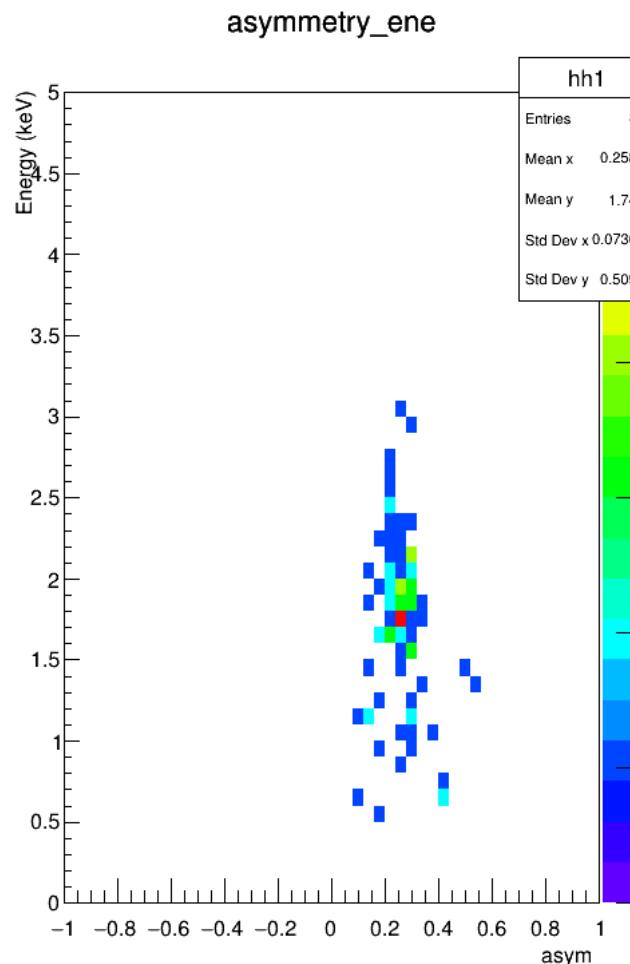

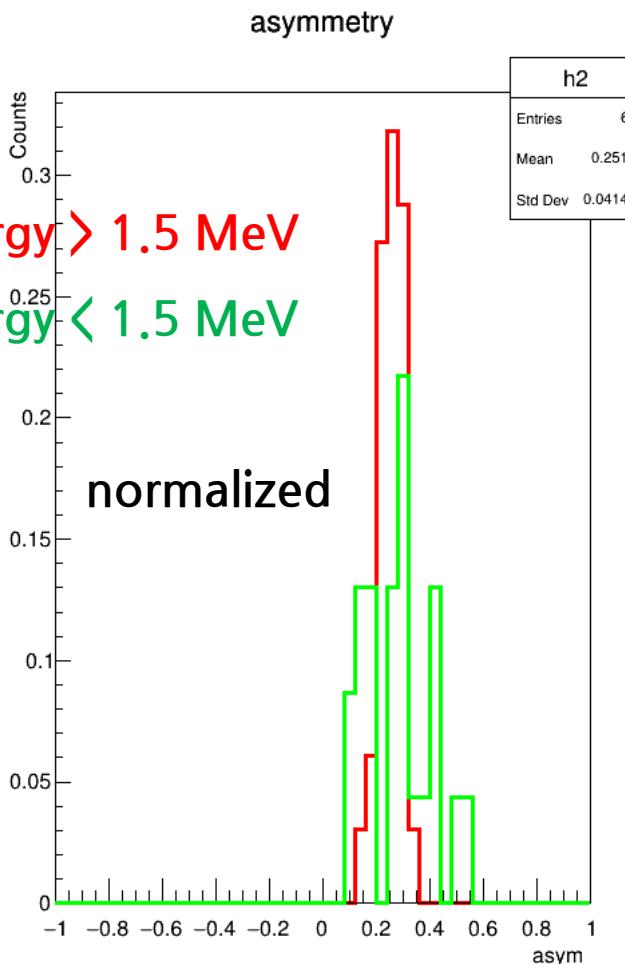

- Quenching factors are similar if there are from same Th-232 origin
- Quenching factors are different by Th-232 origin like two peak alpha events which are from COSINE crystals

Quenching factors have position dependence

NaI-035 asymmetry

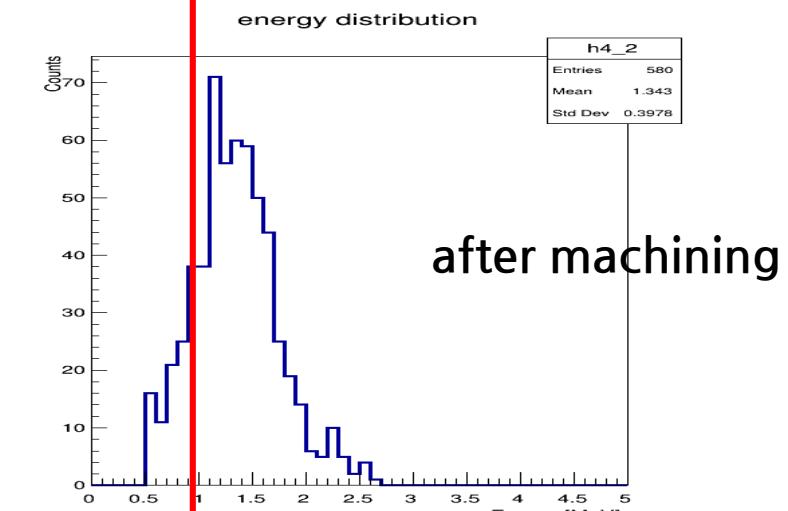

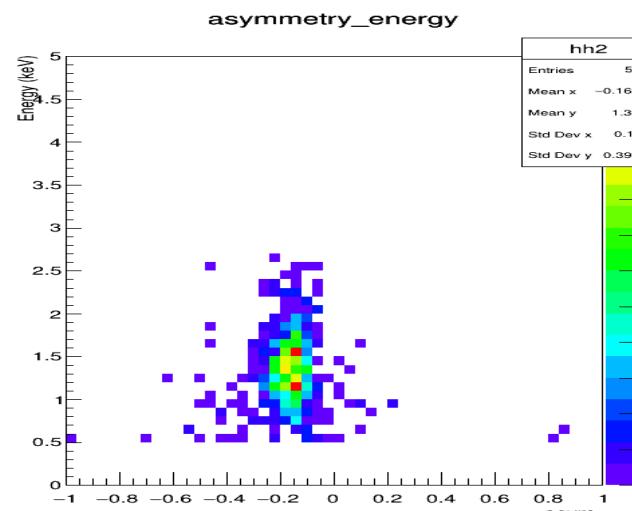

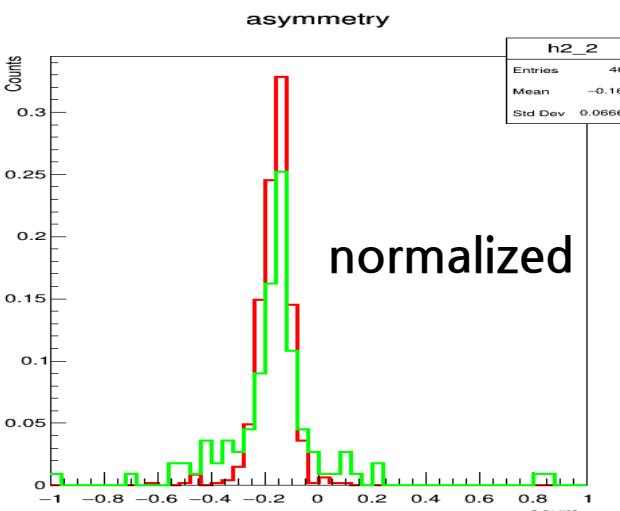

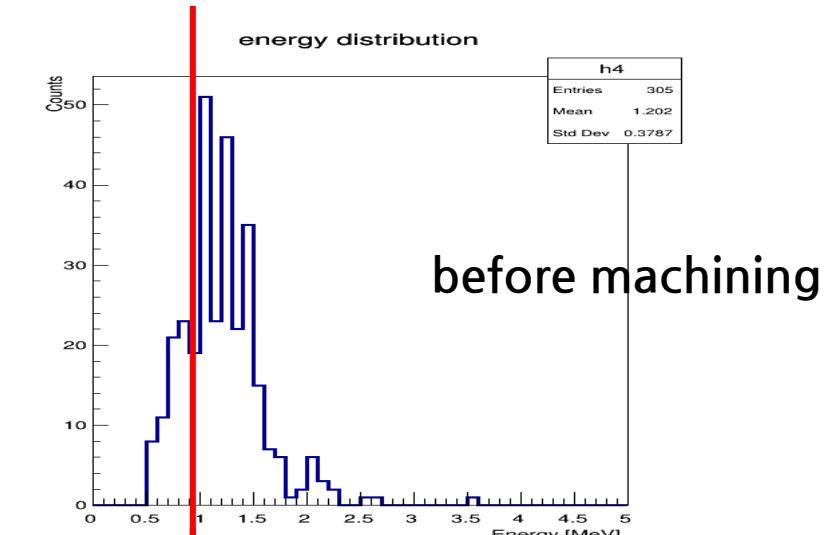

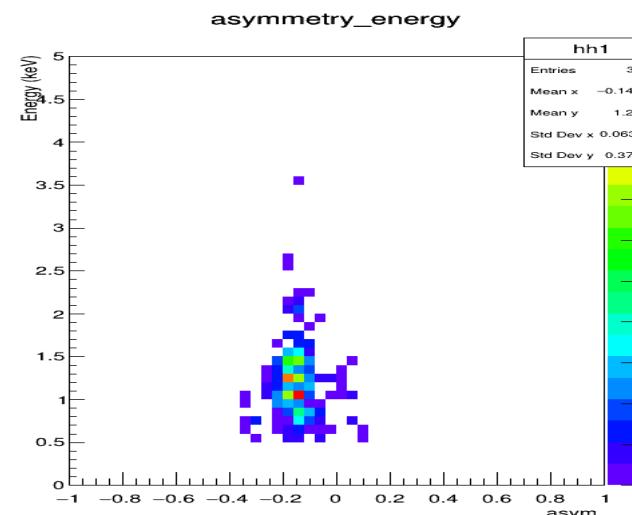

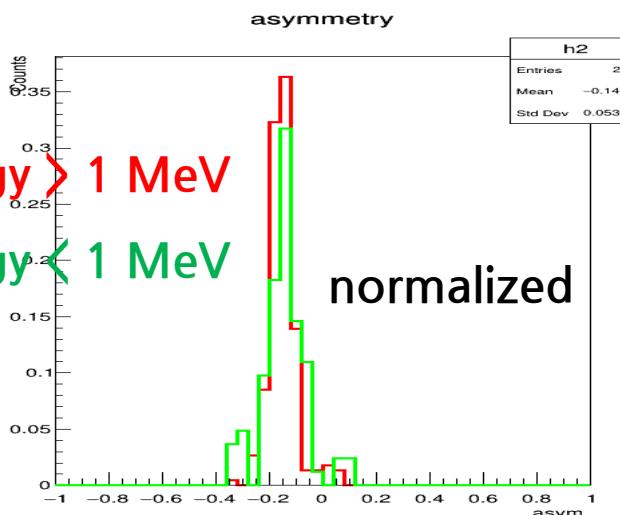

- Energy > 1.5 MeV
- Energy < 1.5 MeV

Some low energy(<1.5 MeV) alpha events are from surface

NaI-034 asymmetry

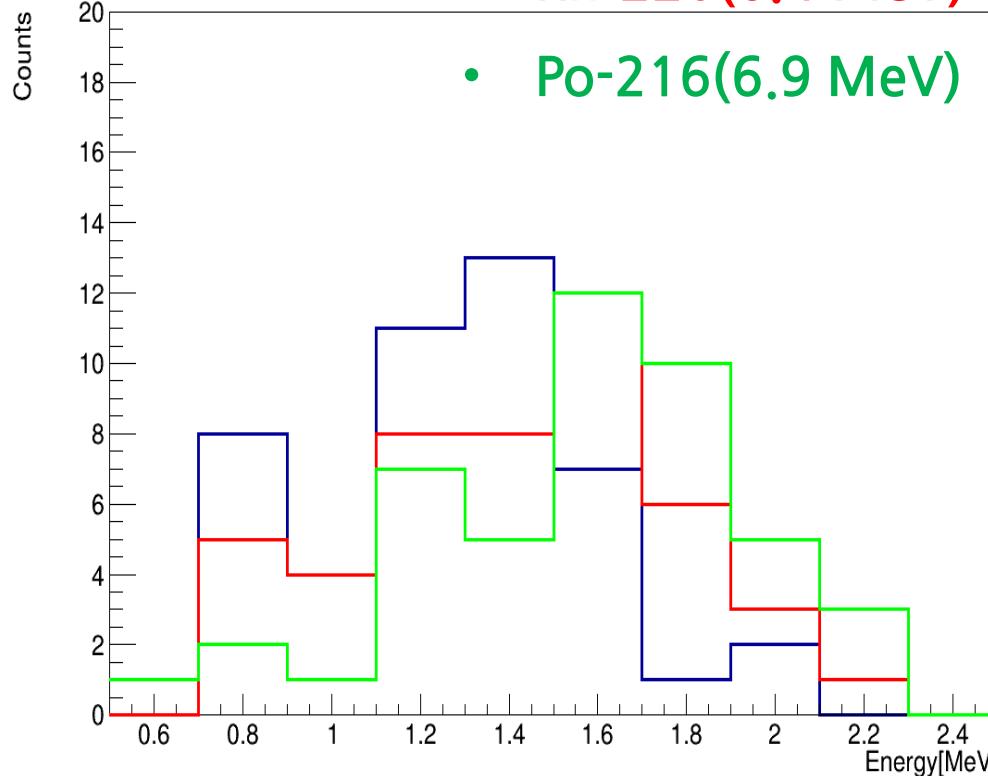

- Energy > 1 MeV
- Energy < 1 MeV

Some low energy(<1 MeV) alpha events are from surface
COSINE lab_meeting

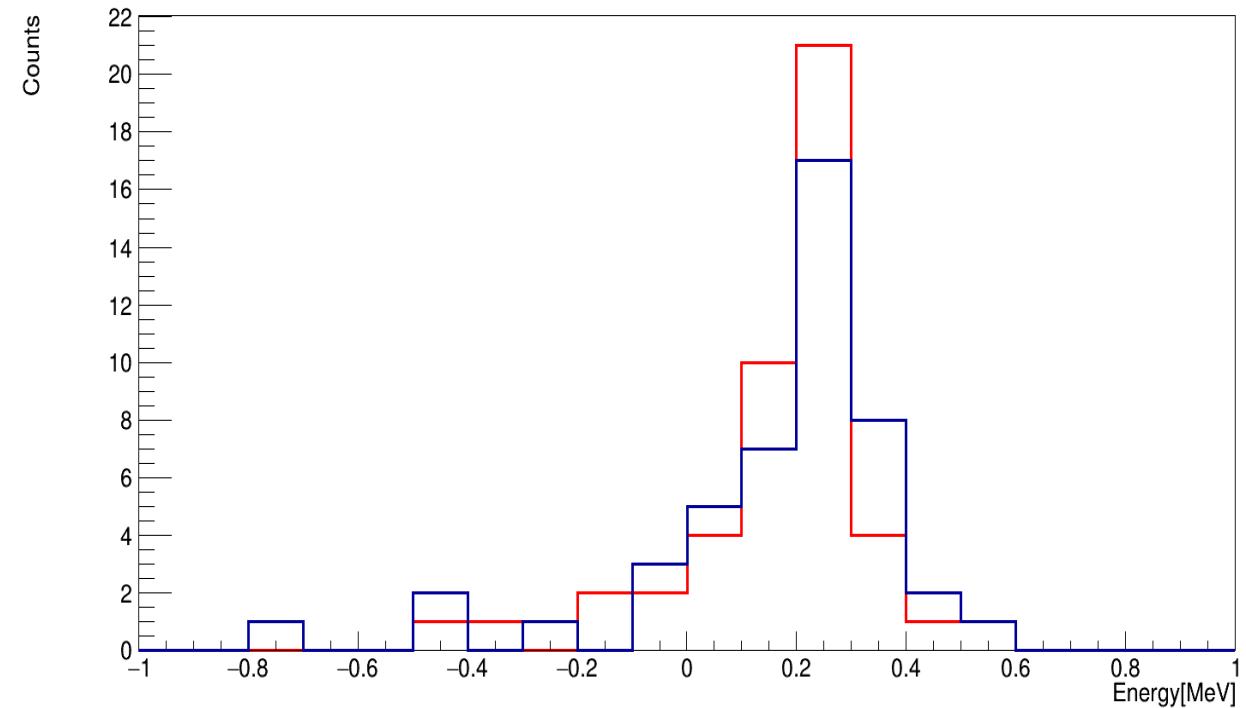

Nal-034 distribution

- Ra-224(5.7 MeV)
- Rn-220(6.4 MeV)
- Po-216(6.9 MeV)

Alpha energy distribution

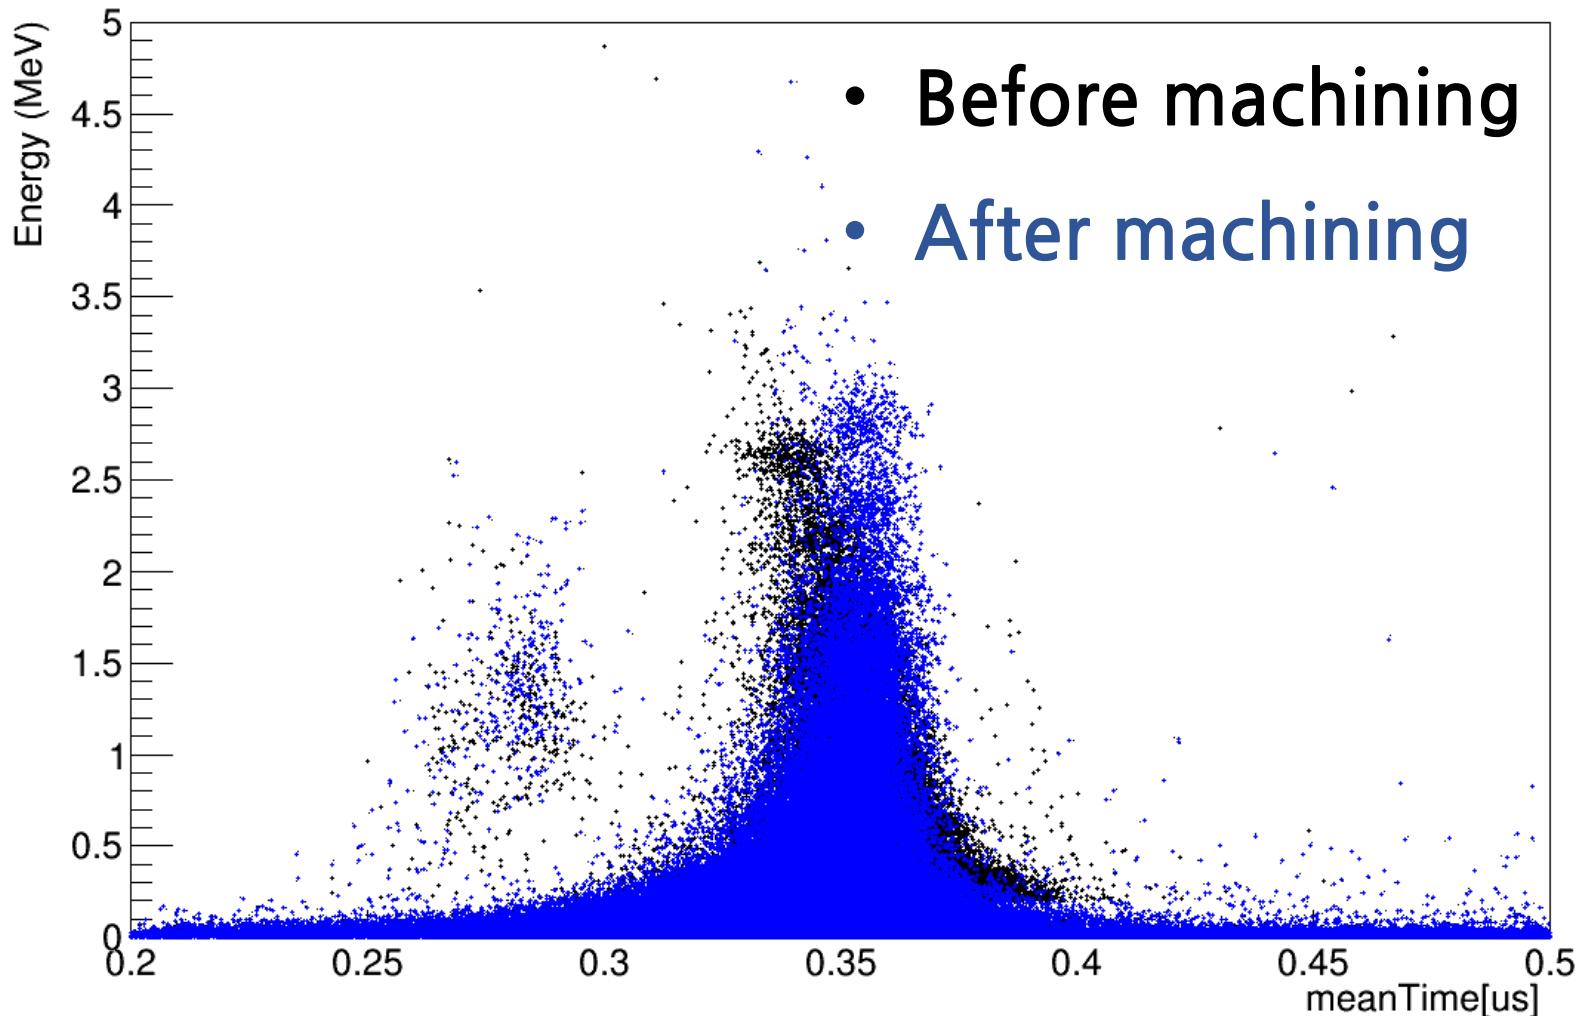

- Rn-220(6.4 MeV) - Ra-224(5.7 MeV)
- Po-216(6.9 MeV) - Rn-220(6.4 MeV)

Alpha-alpha energy difference distribution

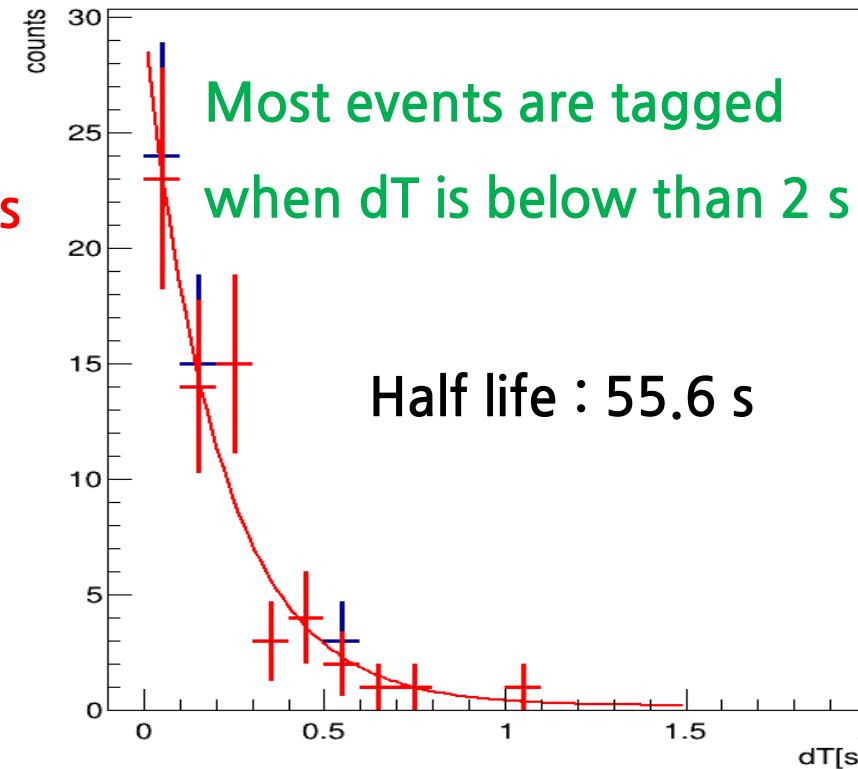

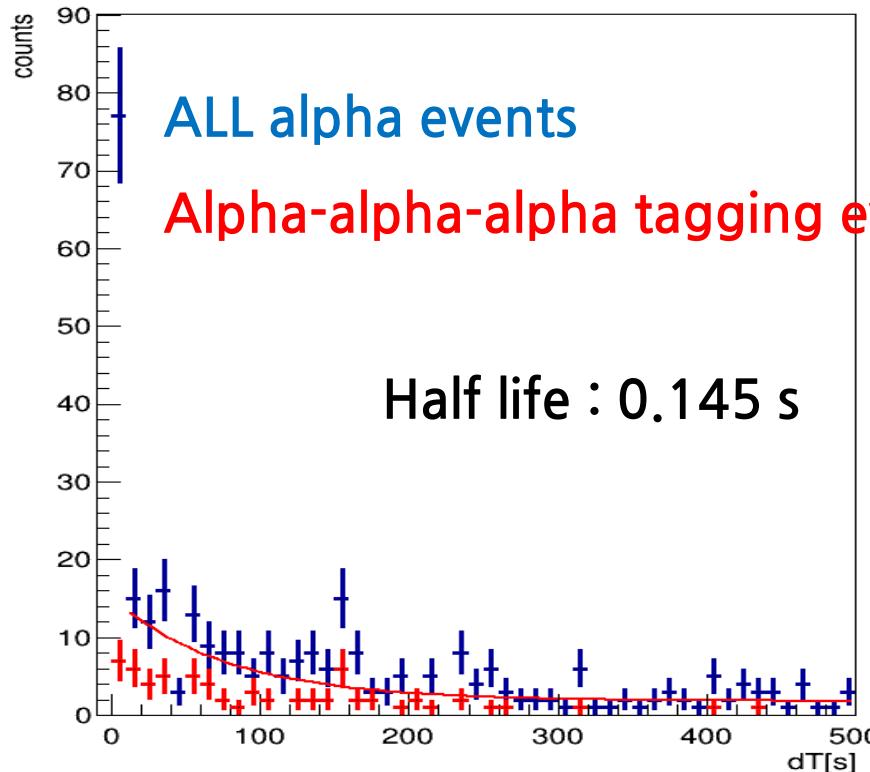

Nal-034 alpha

- Voltage changed 1100 V ,1280 V -> 1050 V, 1150 V

Nal-034 alpha decay time

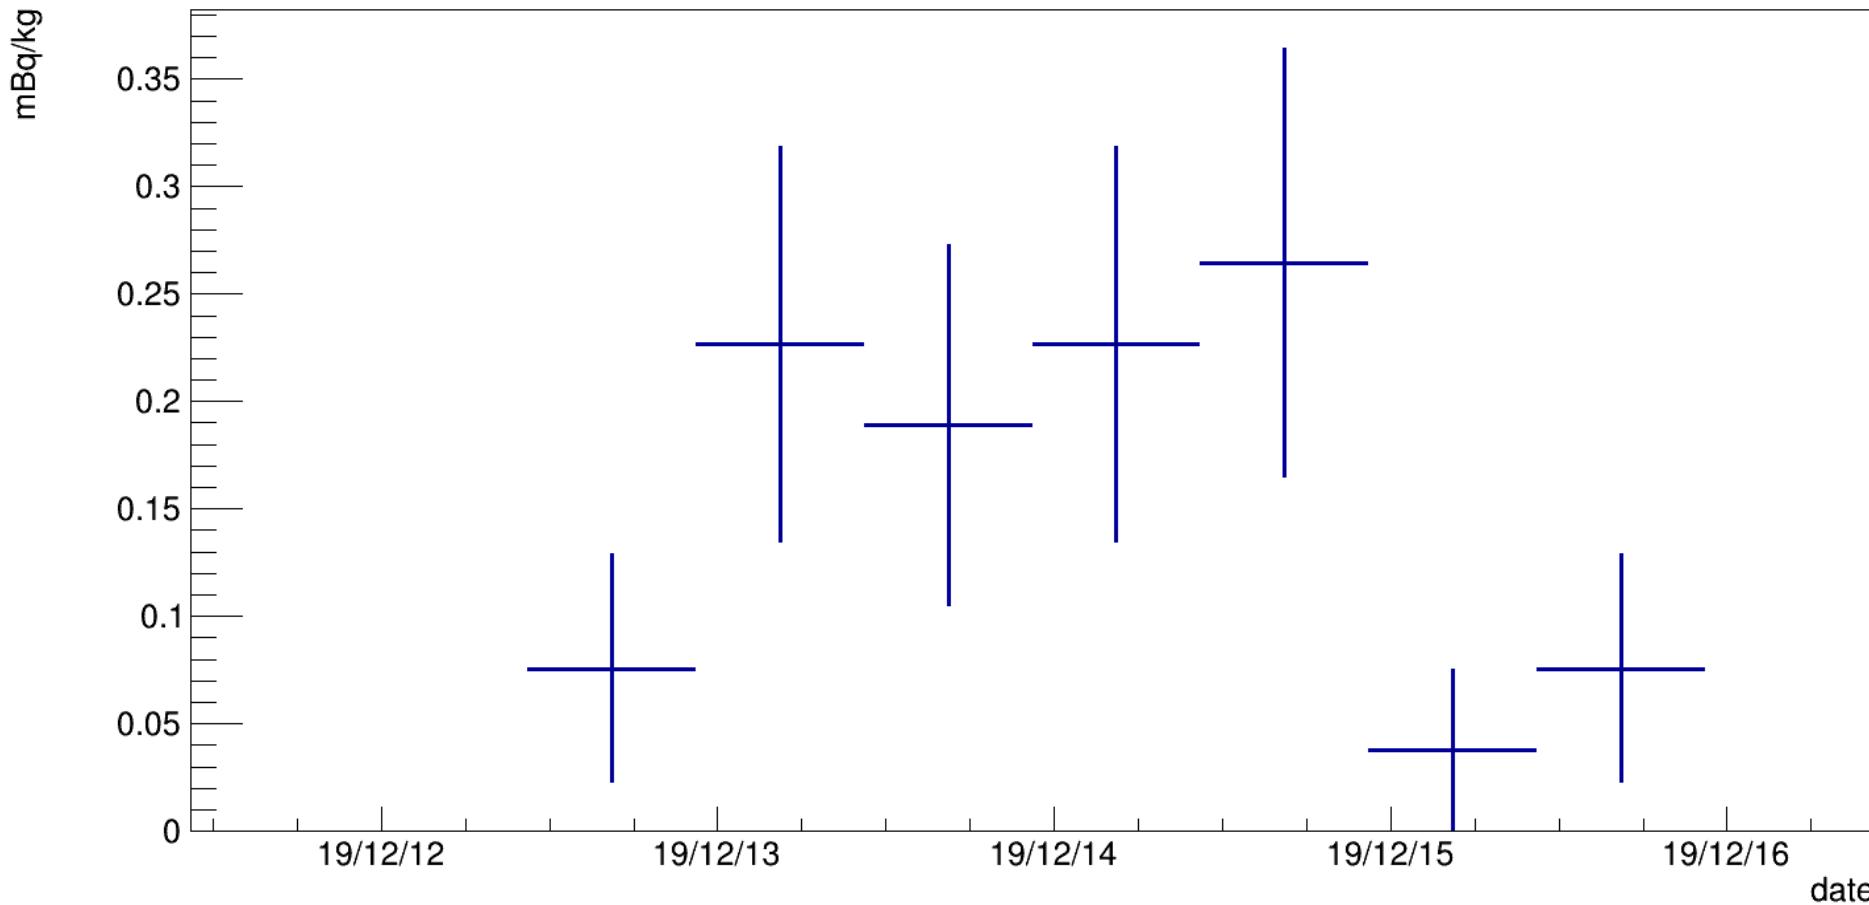

Time difference distribution

	Activity(uBq/kg)	Conversion to ppt(if th232 is in equilibrium)
Nal-034 Before machining(230 h)	24.8 ± 5.5	6.1 ± 1.4
Nal-034 After machining(520 h)	35.2 ± 5.2	8.6 ± 1.3
Nal-035	11.5 ± 4.7	2.8 ± 1.1

Nal-035 alpha rate

- 82 hours data

Nal-035 alpha rate(Th-232 contamination)

- ~ 20 % alpha events from alpha-alpha-alpha decay in Th232 chain

Backup
